The CS Series

The CS professional series from Phase Technology redefines what to expect in an entry-level speaker, offering the looks and performance of premium-priced solutions without the cost.

In-wall, in-ceiling, dual channel single point stereo, and even angled speakers; there is a CS model for almost any application.

The CS line incorporates features such as polypropylene cones with butyl rubber surrounds, swiveling dome tweeters, true high-pass/low-pass crossovers, high-quality metal binding posts, and micro-flange, paintable magnetic grilles.

Phase Technology's CS line delivers high-end performance at entry-level prices, and looks good doing it.
