

# Wireless speakers are fun, but the OS-440 provides you with an entire wireless SYSTEM.

The OS-440 is the industry's first outdoor smart amplifier.

# OS-440

Your smart home deserves a smart yard. The OS-440 is an outdoor amplifier, allowing unprecedented freedom when designing outdoor audio systems.

Without being tethered to the house, the OS-440 can wirelessly connect to the home's network and function as a certified Google Chromecast device, interfaces with dlna servers, and multi-zone wireless control.

On-board Bluetooth functionality and a closed, stand alone WiFi direct mode round out the wireless connectivity options of the OS-440. Connect an Alexa-enabled device to the OS-440 for a voice-controlled outdoor audio system!

Hard-wiring sources are also an option due to analog and digital inputs, allowing the OS-440 to interface with any system or source already in the home.

**OS-440**

|                         |  |
|-------------------------|--|
